Summary

- Backend Developer skilled in building robust solutions using .NET technologies, Entity Framework, and RESTful APIs, with additional familiarity with Django REST Framework. With strong problem-solving abilities, attention to detail, and a commitment to writing maintainable, testable code.

Education

- Faculty of Computers and Information Technology, Assiut University (GPA 3.63) 2022 - Present
Computer Science Department

Experience

- Backend Developer - Nova Solutions
October 2025 – Present | Remote / Egypt

Projects

QuizRoom (Student Quiz Management System) – Django REST Framework (08/2025) [GitHub](#)

- Developed the backend for a quiz management system with student and instructor clients.
- Built secure REST APIs with JWT authentication, role-based access, quiz life cycle management, and instructor analytics.
- Technologies: Django REST Framework, PostgreSQL, JWT, Python

Twitter Clone Web API – ASP.NET Core (07/2025) [GitHub](#)

- Designed and implemented a REST API replicating core Twitter features (authentication, tweets, comments, likes, follows).
- Technologies: ASP.NET Core 9, EF Core, SQL Server, ASP.NET Identity, JWT

KitabKhana (Online Bookstore) – ASP.NET Core MVC (06/2025) [GitHub](#)

- Created an online bookstore simulation with browsing, cart, and Stripe-powered payments.
- Implemented user authentication, purchase history, and applied Repository Pattern with Dependency Injection for scalable architecture.
- Technologies: ASP.NET Core MVC, EF Core, SQL Server, Stripe API, ASP.NET Identity

RailRoads & Routes (Transportation Booking Platform) – ASP.NET Core MVC (04/2025) [GitHub](#)

- Contributed to developing a booking platform for buses and trains with trip scheduling, vehicle/station management, and real-time booking using SignalR.
- Implemented secure authentication, booking workflows, and efficient database operations with EF Core.
- Technologies: ASP.NET Core MVC, C#, Entity Framework, SQL Server, ASP.NET Identity, SignalR, Repository Pattern

Skills

- Programming Languages : C, C++, Java, Python, C#.
- Computer Science Fundamentals : Data structures & Algorithms, OOP, Operating Systems, Networking.
- Software Design Principles : Design Patterns, SOLID Principles, Object-Oriented Design.
- Database Technologies& ORMs : Relational Databases, SQL Server ,MySQL, Postgresql, Entity Framework Core,LINQ.
- Back-End Technologies : ASP.NET Core (MVC & Web API), RESTful APIs, JWT, Django REST Framework,Minimal APIs
- Tools: Git & Github, Postman

Certificates

- Foundational C# with Microsoft [Link](#)
- Database Fundamentals [Link](#)
- Cloud and Virtualization Concepts [Link](#)
- Red Hat System Administration one [Link](#)

Volunteering

• OOP Instructor – Summer Training Program

(BIO Code Student Activity)

Led Object-Oriented Programming(OOP) sessions, providing hands-on training and guidance to 30+ students during a summer training program.

Soft Skills Gained: Public speaking, mentoring, leadership, responsibility

Awards

Winner 1ST Place – NASA Space Apps Assiut Hackathon.
